September 2015 onwards

Secretary General

Lead the European Nursing Research Foundation (ENRF), mainly focussing on the available nursing evidence to support EU Policy design. Focus on EU research funds and programmes.

European Nursing Research Foundation

European Non-Governmental Organisation – Research Foundation

March 2002 onwards

Secretary General

Lobby European Commission, European Parliament and Council of Heads of State on behalf of 3 million nurses, through 36 National Nurses Associations in membership of EFN

European Federation of Nurses Associations

European Non-Governmental Organisation – Professional Organisation

Dates	1992 – 2002
Occupation or position held	National Nursing Minimum Data Set Coordinator
Main activities and responsibilities	Outcome Measurements – Policy making – financing system
Name and address of employer	Ministry of Health – UZ Jette – Belgium
Type of business or sector	National Government and University

Dates	1990 – 1992
Occupation or position held	Senior Nurse and Quality Assurance Nurse
Main activities and responsibilities	Management Neonatal ICU and Quality Assurance
Name and address of employer	Al Hada Hospital, Taif, Saudi-Arabia
Type of business or sector	Health Care Sector

Dates	1984 – 1990
Occupation or position held	Nurse
Main activities and responsibilities	Client & Nursing Care
Name and address of employer	De Bijtjes, Vlezenbeek
Type of business or sector	Health Care Sector – Independent Living

Education and training

Dates	2006 – 2013
Title of qualification awarded	PhD
Doctoral Thesis Subject	Is the EU Accession a Policy-window Opportunity for the Nursing Leadership to Advance a Professional Agenda? A Comparative Case Study following an Ethnographic Approach.
Name and type of organisation	Kings College - UK
Classification	ISCED 7

Dates	1995 – 1996
Title of qualification awarded	Master in Quantitative Analysis in Social Science
Thesis subject	Analyses of Psychosocial and Administrative Activities of Public Health Nurses
Name and type of organisation	Catholic University of Brussels, Belgium
Classification	ISCED 6

Dates	1986 – 1989
Title of qualification awarded	Master in Nursing Science - Option Administration & Management
Thesis subject	'Independent Living of Physical Disabled People in Flanders & Brussels'
Name and type of organisation	Free University of Brussels, Belgium
Classification	ISCED 6

Dates	1981 – 1984
Title of qualification awarded	Bachelor in Nursing
Principal subjects	Nursing Care Process
Name and type of organisation	Sint-Elisabeth School for Nursing, Belgium
Classification	ISCED 5

Social Skills

Enthusiastic and motivated, Driver for Change, Alliance Builder, Value promotor, Lobbyist with advocacy and empowerment skills, intercultural skills, consensus and mediating skills, adopting an analytical and critical approach and making sound judgments.

Organisational Skills

Outcome-oriented, Priority-driven, Governance & Management skills, EU Political & Policy skills, EU Lobby skills, Knowledge of Financial management and Reporting, Coaching and Empowering staff, Desire to advance nursing as a profession in all of its branches.

Computer Skills

Competent with Microsoft Office and Statistical programmes such as Statistica, SPSS, Nvivo.

Academic Reviewer	Health Europa editorial board member - Reviewer Journal of Advanced Nursing
EU Appointed Expert	<p>EU Evaluator H2020 & Horizon Europe</p> <p>Collection Advisor Digital Health and Well-being - Open Research Europe</p> <p>Expert European Commission - (1) Ehealth Stakeholder Group DG Connect & DG Sante – (2) AI Expert Group – Health Policy Forum – DG Sante – (3) Co-chair Coalition for Vaccination Hesitance & (4) Cochair Coalition for Ukraine NGOs – (5) Expert HERA – (6) Expert WHO Digitalisation - (7) Taiex Expert – DG European Neighbourhood Policy and Enlargement Negotiations</p>
Coordinator EU Project	<p>ENS4Care (2013-2015) DG Connect – EU Thematic Network – EUR 500K – Development of evidence based ICT guidelines for the implementation of eHealth services in nursing and social care, building on existing good nursing and social work practices in eHealth services and, through evaluation and consensus building, create a set of guidelines on healthy lifestyle and prevention, empower and educate patients and the public in the prevention of chronic non-communicable diseases (NCDs). Other EU guidelines relate to clinical practice (COPD), integrated care, advanced roles and nurse ePrescribing.</p>
EU Partner Consortium Ongoing EU Project	<p>EU-WHO Nursing Action (2024-2028)</p> <p>Address nursing shortages by collecting EFN Members' best practices on recruitment and retention of nurses, which can then be implemented in all the EU Member States. EFN will develop two Policy Briefs, one on Nursing Students Mentorship and one on Nursing Safe-Staffing Levels (SSL), based on the data collection and intelligence gathering from the literature and best practices from the EFN Members. The project will create recruitment action plans, mentoring programmes to attract a new generation of nurses, develop nurse workforce impact assessments to understand the problems behind these structural shortages and strategies to improve the health and wellbeing of nurses, and implementing training opportunities and actions to ensure the healthcare workforce can benefit of the digital transformation.</p> <p>BEWELL (2022-2026) - Blueprint alliance for a future hEalth Workforce strategy on digital and green skills</p> <p>The BeWell project aims to form an alliance, to build a movement of all healthcare stakeholders supporting and committed to the development, implementation and upscaling of the strategy on upskilling and reskilling of the European health workforce. By addressing the existing skill mismatches and strengthening these competencies, the project will enable the health workforce to be better prepared to face future challenges and adapt to ever-evolving societal contexts. The ultimate project aim is to develop a green and digital skills strategy for the health ecosystem that can be implemented at a local, regional, national, and ultimately at the European level through the Pact for Skills, in the context of the Blueprint for Sectoral cooperation on skills.</p>

KeepCaring EU project (2024-2028)

KeepCaring aims to (re-)build wellbeing and resilience of the healthcare workforce in EU hospitals in the surgical pathway, and to promote onboarding and staying in the workplace. The project will identify new factors that influence job resources, resilience and stress in healthcare professionals and to empower the hospital workforce by evaluating the (cost-) effectiveness of existing (digital) tools and by further augmenting the AI-prediction tools based on user insights. The project will support healthcare professionals and students in the dynamics of joint interaction in teams. It is key to support hospital organisations in making decisions for sustaining a healthy, inclusive and diversified health and care workforce.

H2020 projects on Electronic Health Records (EHR)

[Smart4Health](#) – which is developing, testing and validating a platform prototype for the Smart4Health citizen-centred health record EU-EHR exchange. The goal is to deploy citizen-centred solutions and services in a digital single market for wellbeing and healthcare, through an easy-to-use, secure, constantly accessible and portable health data and services prototype, thus advancing citizens' health and wellbeing, and digital health innovation.

[InteropEHRate](#), developing a standardized and unique European extended-EHR to preserve the European assets and professional ways of working, by addressing the current lack of standardization and security, defining a set of integrated protocols and conformance criteria for mobile apps, supporting secure and portable local storage and backup, released as open specifications. The project will integrate these new protocols with technologies for information extraction and translation, to reduce the difficulties in health data exchange related to the different terminologies and languages adopted in different European countries and by different healthcare providers. It aims at providing the European citizens with a complete view of their health history, shareable with healthcare professionals and researchers.

In both projects, the EFN is representing the end-users, facilitating a co-design with nurses' representatives. The EFN is responsible for dissemination activities at the EU level, as well as assisting in the implementation of the project's outcome once it has finished

Erasmus+ project on vaccination - [IMMUNION](#). To support the capacity building of the Coalition for HCP on vaccination hesitance.

[Qualment](#) - KA2 - Cooperation for Innovation and the Exchange of Good Practices / KA203 - Strategic Partnerships for higher education - Quality Mentorship for Developing Competent Nursing Students

[Smartcare](#) – DG Connect Competitiveness Innovation Framework ([CIP PSP 2012](#)) – Aimed to join up the Information and Communications Technologies (ICT) and service processes for quality

integrated care in Europe. SmartCare will enable the delivery of integrated care to older European citizens to support them to live independent lives within the community by providing the ICT tools necessary to integrated care pathways between social and health services. The regions engaged in SmartCare pilots are: Friuli-Venezia Giulia, Scotland, Aragon, and Southern Denmark, Tallin, South Karelia, Attica, North Brabant, Kraljevo and Uppsala.

[EU Joint Action on Quality and Safety](#) – DG Sante – Aimed to strengthen cooperation between Member States, international organisations and EU stakeholders on issues related to quality of healthcare. One of the main objectives is the creation of a permanent network for Patient Safety in Europe that will reflect on principles of good quality healthcare, patient safety and patient involvement. In the long run, this voluntary exchange of experiences may lead to a peer review system for quality management systems in healthcare. This approach will build on the work of EUNetPaS. The JA was preceded by the [EUNetPaS](#) – co-financed by DG Sante and coordinated by the HAS (Haute Autorité de la Santé – France) – Its main objective was to produce an European added value of Member States collaboration by mutual support, transfer of knowledge, and good practice and exchange of ideas and materials for accelerating progress in Patient Safety; and set up a pan european network for patient safety, involving stakeholders and organised around national nodes or coordinators which will be the ultimate beneficiaries of the outputs of EUNetPaS.

[EU Joint Action Workforce for Health](#) – DG Sante – Supported countries to move forward on the planning process of the health workforce and to prepare its future by exchanges of best practices between Member States, building their capacity to take effective and sustainable measures in workforce policies. Developing health workforce forecasting and planning capacity, sharing and benchmarking practices, results, knowledge and expertise, supporting evidence-based decision making is key to meet current and future challenges in health care by taking into account demand and supply and aim at sustainability of health systems.

Continuous Professional Development – DG Sante – Study between EU Healthcare Professionals Organisations concerning the review and mapping of continuous professional development and lifelong learning for health professionals in the EU – https://ec.europa.eu/health/sites/health/files/workforce/docs/cpd_mapping_report_en.pdf

[EU Joint Action Health Governance Initiative](#) – DG Sante – Aimed at establishing a governance structure for eHealth within Europe in order to ensure continuity of healthcare both at home and across borders. The eHGI is about making e-Health fit for practice and was presented as a political initiative aiming to support the political work of the e-Health governance structure of the EU Member States in developing strategies, priorities, recommendations and guidelines on how to develop e-Health in Europe.
